**KTM 85 SX (2025)**  
**GasGas MC 85 (2025)**

**\*\*No Spark Plug Access\*\***

**KTM 2.6g FUEL TANK**

**IMS Tank ID: KTM-36**

**IMS Part #**  
**113360/213360**

**IMS PARTS LIST**

- (1) Fuel Tank
- \*(1) Gas Cap (322100-BLK)**
- \*(1) Seal For Cap (322101)**
- (\*Excluded on Dry-Break\*)**
- (14") 3/16 Vacuum Line  
(MCM-5552K24)
- (1) 7/16" Hose Clamp  
(MCM-7329K35)
- (1) Small Hose Clamp  
(MCM-5324K312)
- (8) 5x12 Button Flange Bolt  
(MTP-73801F05012)
- (2) Aluminum Spacer  
(BRK-IMS-0831)
- (2) Short Seat Hook  
(BRK-SITWASH-S)
- (6.5") Heat Shield Sleeve For  
Fuel Line (MCM-2627K33)
- (2) 5x12 Hex Head Flange  
Bolt (MTP-1189105012)
- (1) 5x25 Flat Head Screw  
(MCM-91263A836)

**OEM ITEMS TO USE**

- Shrouds
- . Petcock

**WARNING!**

Clean Tank Interior Thoroughly Before Installation. Install This Fuel Tank ONLY in a Well Ventilated Area, As Gasoline Fumes Are EXTREMELY Dangerous. DO NOT START OR OPERATE THE VEHICLE IF THERE ARE ANY FUEL LEAKS! IMS Recommends That Installation Be Done By a Licensed Mechanic. Read All Instructions First Before Beginning Installation.

**NOTE: THE SPARKPLUG CANNOT BE CHANGED  
WHEN THIS IMS TANK IS ON THE BIKE.**

**TANK REMOVAL**

Drain all fuel from OEM fuel tank into a government approved fuel container with a greater capacity than fuel tank on vehicle.

Remove seat, fuel line, petcock, shrouds, seat hook and tank bolt and bushing (center mount). Remove OEM tank.

**PLEASE NOTE THAT BOTH OEM CENTER SEAT HOOKS WILL NOT BE USED ON IMS TANK. ONLY THE FRONT OF SEAT WILL BE BOLTED DOWN & REAR SECTION GOING UNDERNEATH OEM PLASTIC SEAT HOOK.**

**TANK INSTALLATION**

Install the petcock using the provided (2) 5x12mm Hex flange bolts with outlet facing towards the inside part of tank (**See Fig. 1**). Mount the IMS tank onto the vehicle and install OEM center-mounting bolt.

Replace the OEM fuel line previously connected to the petcock with the yellow piece of fuel line provided by IMS. Trim fuel line to necessary length that allows you to reconnect the fuel line to the petcock. Use larger hose clamp on end connecting to the petcock, and smaller clamp on end that connects back to the carb. Install provided heat shield sleeve around newly installed fuel line.

Install short sit washer on lower shroud inserts using a 5x12 button bolt on each side (**See Fig. 1**). Slide shroud into lower shroud/sit washer. Attach the shrouds to the tank with the remaining (6) 5x12mm Bolts supplied. KTM models require the aluminum spacer to be used on the remaining side shroud insert (Underneath the shrouds). **GasGas models don't require use of aluminum spacers.**

Seat must be installed by lining it up directly on top of tank, just enough for the rear plastic seat hook to clear the rear connection. Push seat down and forward at the same time, and once fully down you can slide seat back so that the rear connection slides into place. Re-install front of seat using the provided (1) 5x25 flat head screw.

Be sure that the tank is mounted securely and does not bind or in any way inhibit the controls or function of the vehicle. Ensure that there are no sharp objects that rub against the tank that may eventually puncture the tank. Check that you have sufficient clearance from any heat source that could melt the fuel tank.

Turn the petcock to the closed position and fill your new **IMS** fuel tank. Always check for any fuel Leaks Before Operating your Bike and enjoy your Longer Ride!

**"FOR COMPETITION USE ONLY"**

"Legal in California ONLY for racing vehicles which may never be used upon a highway."

**DISCLAIMER:**

Due to uncontrolled variables in the manufacturing process of rotationally molded fuel tanks, the fuel tank may vary in size and shape by up to 7% of the manufacturer's original listed capacity
